Raising Awareness About School Choice

There's good news for community organizations, groups and nonprofits that support school choice. They now have another way to raise awareness about the education options available to families.

An effort called National School Choice Week will be held January 25-31, 2015. With more than 10,000 events planned, it will be the nation's largest-ever education-related celebration.

The goal is to shine a positive light on all types of education options available for children and families—including traditional public schools, public charter schools, magnet schools, online learning, private schools, and home schooling.

To take part, community groups can receive free meeting mate-

rials that can be used to educate others about the education choices available in their community.

The materials include 24 yellow fleece scarves, posters, placards and other educational materials. They can be ordered at schoolchoiceweek.com/mymeeting. Shipping is also free.

According to Andrew Campanella, president of National School Choice Week, school choice is a local issue with national importance. He said the goal of the Week is to make sure all parents know what choices they have when it comes to their child's schooling. He added that groups interested in receiving materials should register online by January 12, and that supplies will be provided on a "first come, first served" basis.

For more information, visit www.schoolchoiceweek.com/mymeeting.

Small Businesses Increase Their Productivity Through Modern Technology

As more small- and medium-size-business owners look for ways to increase productivity, many are focusing their attention on technology as a productivity driver and re-evaluating their technology infrastructure.

Small- and medium-size-business staffs, who are often forced to do more with less time and fewer resources, are moving away from tools that require them to learn how new technologies work and toward tools that learn to work the way they do. The right technology can increase efficiency, save money and reduce waste.

Productivity solutions are evolving to provide easy access at any time, through any device. They allow users to stay connected anywhere and retrieve important documents as needed, without interruption. For example, if a small- or medium-size-business owner is at a client's office, he or she can use a phone or tablet to access a contract and share information instantly. Owners can gain even more of a competitive edge by connecting data from devices and sensors with the cloud and business intelligence tools.

As a part of normal product life cycles and to accommodate the shift toward modern technology, Microsoft will completely end support for Windows Server 2003 on July 14, 2015. Security patches and updates will no longer be available after this period. Research from IDC confirms that businesses should thoughtfully consider using this moment as a starting point for the shift toward modern technology. "We think customers should take advantage of this deadline and see it as an opportunity not only to move forward to a newer version of Windows but also to modernize and prepare for the next generation of computers. Hybrid and public clouds are important components of next-generation IT."

A variety of easy-to-integrate options are available for those

ready to upgrade, including new servers, hosting partners and Office 365. The flexibility of Azure, Microsoft's cloud platform, to scale up or down aligns with the increased need for flexibility among small- and medium-size businesses. Azure integrates a growing collection of services—computing, storage, data, networking and apps—that help small- and medium-size businesses move faster, do more and reduce costs.

Automating manual tasks and making it easier for employees to communicate and collaborate through modern technology mean small- and medium-size businesses can gain efficiencies and improve innovation, and they can choose between deploying workloads and applications on premises or in the cloud to meet today's business demands.

**Learn The Factors That Influence Prices
At The Pump**

Expected to make this holiday season one of the busiest for travel on record. Many drivers will take longer road trips than last year, due in no small part to major relief at the pump. Across the U.S., consumers are currently paying less than \$2.40 per gallon for regular gasoline, the lowest average price since May 2009.

Why was there such a steep plunge in gas prices after they were so high last summer? In order to understand why, you need to consider the series of factors that influence the price of oil, the commodity from which gasoline is produced.

Futures Fundamentals (www.futuresfundamentals.com), the new online resource brought to you by CME Group—the world's leading and most diverse derivatives marketplace—now provides visitors with an easy-to-follow infographic titled "The Facts Behind Oil Prices" to explain the many components that determine the price of fuel: from global demand to the changing supply landscape to geopolitical issues to others.

This diagram follows the release of Futures Fundamentals' video tutorial, "The Story of Oil," which takes viewers on a journey from the ground to the pump, explaining the extraction of crude from underground wells to price discovery at the exchange, and finally to the gas station.

"The Facts Behind Oil Prices" and "The Story of Oil" are just a few of the concepts made simple on the site, which also tackles complex topics like food prices and mortgage rates.

"In an increasingly interconnected world, we've seen growing interest among consumers and businesses for easy-to-understand information about what factors cause commodity prices to fluctuate and how to manage that risk," said Anita Liskey, CME Group Managing Director, Corporate Marketing & Communications. "Our educational website addresses these questions and demonstrates through simple images, videos and examples how futures and options can help people and businesses manage price risk."

Visit Futures Fundamentals today to uncover the reasons behind oil prices and start learning how the marketplace impacts the world around you.

Fun By The Numbers

Like puzzles? Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test!

Level: Advanced

Here's How It Works:

Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!
