Protect Your Deck For The Winter

Foot traffic, food spills and weather can take their toll on any deck, but you can clean and protect your deck to prepare it for the winter with a few simple steps.

- **Clean Thoroughly:** Ground-in dirt and barbecue stains can ruin your deck's appearance and ultimately degrade the wood. Exposure to sun can cause wood to gray and weather and exposure to moisture can encourage the growth of mold, mildew, moss and algae.

Use a bleach-free cleaner specifically formulated for wood to restore your deck to its natural beauty without bleaching or yellowing as chlorine bleach can. Cleaners such as Jomax Deck Wash

loosen and lift dirt from gray weathered wood and remove stains caused by mold and mildew to prepare the deck for a new protective coating. A convenient hose mount applicator makes it easy to use; just attach to an ordinary garden hose and spray.

- **Apply a Protective Finish:** After cleaning, it's important to apply a water-repellent finish to protect your deck against the damaging effects of winter. Moisture from ice, snow, sleet and rain can penetrate the surface if it's not protected and can cause splitting, cracking and warping. Fortunately, there's a wide variety of premium exterior wood finishes that offer protection against the elements, while giving you the opportunity to achieve just about any look you like.

Here's How It Works:

Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!
